

The logo features a stylized dragonfly with its wings spread, positioned above the word "Dragonfly".

Dragonfly

NOVAA

What's Inside

Novaa Device

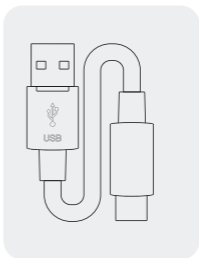

Features

**LED Draw
Timer**

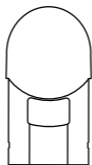

**Smart POD
Detection**

USB-C Charger

Insert & Go

Insert any Dragonfly or Betty Pod into device. Pod will buzz and illuminate, confirming it's detected and ready for use.

Novaa 3 Key Features

Ceramic Core Heating

Even, efficient heat for smoother, cleaner vapor from first draw to last.

Auto Draw Activation

No buttons. Just inhale gently to activate.

Haptic Feedback

A short vibration confirms pod insertion and preheat readiness.

Smart POD Detection

Automatically sets the ideal temperature for your pod type.

Preheat/Clog Remover

Warms thick oil in cold weather. Insert and remove the pod 2× to activate. Most clogs can be removed by blowing 1-3 seconds through the pod after pre-heating.

How to Use

Fully charge your device before first use.

Insert Pod

- Gently insert a Novaa pod into the device.
- Magnetic connection ensures alignment; a vibration confirms secure placement.

Start Vaping

- Inhale gently — no buttons required.
- Auto-draw activates ceramic core heating.

Preheat Mode

For cold weather or thick oil:

- Quickly insert and remove the pod 2× within 3 seconds.
- The status light will pulse for ~5 seconds.
- The device vibrates when ready.

Increase Temperature (Optional)

For thicker oils or stronger vapor:

- remove and reinsert 3× within 3 seconds.
- A red light confirms the temperature increase.
- remove and reinsert 3× within 3 seconds to return back to Level 1 temperature.
- The device will vibrate for 0.2s to confirm voltage change.

Charging

- Charge via USB-C. Solid white = fully charged.

Smart Pod Detection Specs

Level 1 = Standard Temp (default) Level 2 = High Temp (triple-insert to activate)

POD COLOR	OIL TYPE & LIGHT COLOR
	CURED RESIN/DISTILLATE  Green Light
	LIVE RESIN/LIVE ROSIN  Blue Light
	LIVE DIAMONDS  Yellow Light
	2ND GENERATION POD  White Light

When a pod is inserted, auto detection starts at Level 1 (standard temp) to maximize flavor and terpene retention. To switch to Level 2, quickly insert and remove the pod 3× within 3 seconds. **A red light confirms the temperature increase.**

TROUBLESHOOTING

Having trouble with your Nova or Pod? Please refer to dragonflyprocessing.com/m for a full guide on how to use and troubleshoot your device.
